CHERRY
Wine

East Coast Genetics provides more than just a clone or seed, lab testing and genetics research, we provide what we learn to our farmers. With help from the genetics company your farm can make more accurate projections on yields, and Cannabinoid content. With consistently higher CBD content than comparable varieties, Cherrywine is the East Coast Leader.

CHERRY WINE Clones

- Guaranteed GRADE A Clones
- Rapid Strong Roots
- Self Supportive Plant Structure
- High Yielding Phenotypes
- Large Distributer Network ensures Clone Freshness and order security

ECgenetics.com

“Having East Coast Genetics available throughout our first season was like having a built in crop consultant.”

- Ryan N.C. Hemp Farmer

East Coast Genetics offers guidance not only on genetic selection, transplanting, fertilization, lab testing, but also in field visits for problem consultations and pest management. We are farmers, we want to help our fellow farmers find ways to manage their crops without expensive cannabis marketed products or unnecessary expenses targeted by product manufacturers.

Feminized Seed

- Reduced Input Costs
- Increased Yield per plant
- Self Supportive Plant Structure
- Minimal Staking
- Mechanized Planting Options

Commercial NC Seed Facility
